					52	1.125	0.844	0.750	0.675

To calculate gear center distance (Dc) add 1/2 of each gear Diametrical Pitch

64 Pitch - 11 pinion - 37 spur -  $Dc = (.172 / 2) + (.578 / 2)$

$Dc = .086 + .289$

$Dc = .375$

**For a SIDEWINDER Installation**

Installing an 1106 motor the bell is 14.3mm diameter (.563"), 1/2 the distance is .282"

The rear axle of 3/32", 1/2 the diameter is .047"

The minimum distance for clearance is .282" + .047" = .329"
